Bringing School Home

Dear Parent,

An obstacle is a chance for us to do our best and overcoming them make us stronger and resilient for new challenges. The nationwide lockdown has cemented the need for virtual learning.

Responding to the situation, BBPS Dwarka has initiated e-learning through Google Classroom and other applications. The procedure for accessing the same and the class time table has been shared with you. Our educators have also created innovative teaching-learning content for our children confined at home. We have also revolutionized assessment and an array of strategies like online quiz and digital worksheets are being utilized.

You are requested to ensure that your ward regularly attends the online classes, attempt the assignment and submit them regularly.

You will also be glad to know that our educators are also utilizing this time to pursue various courses to add to their repertoire of skills.

To reiterate, it's only the brick and mortar school that is under lockdown. Our educators' commitment, zeal and enthusiasm towards learning remains the same and we look forward to your support and cooperation to make our digital learning initiative a resounding success.
