

Bal Bharati Public School, Dwarka

Dear Parents,

Bal Bharati Public School, Dwarka has a strong commitment to high-quality 21st century education and a charter to provide students with the knowledge, skills and abilities to pursue their lives as smart, safe, responsible, successful global citizens.

You have entrusted us with your most valuable asset, and we do not take that responsibility lightly. We support each student daily as they move toward reaching their potential. This mission takes a strong level of trust and support from everyone involved.

We are happy to inform you that in order to successfully meet the challenges in this fast-changing environment, and in accordance with the best educational technology practices, **Connected Classrooms** - a cloud based program for connecting learning at school and home is being integrated in our school. This is powered by **CRISP – Consortium for Research and Innovation In School Pedagogy**. Using a most modern, cloud-computing platform, each child's learning will be individualized and extended from the classroom to home.

This program will enable students to:

- learn from audio and video multimedia lessons filtered/created by their school teachers
- replay and review each lesson any number of times to learn from it, anytime, anywhere
- view and review class lessons and assignments, in all subjects, at their pace
- learn as per their individual learning style, mentored by their class teacher
- see homework assignments, worksheets, and circulars, calendar of syllabus and events

This will keep you as parents, updated with classroom activities, news and information to further our parent/school partnership.

Our teachers are working tirelessly to provide uninterrupted teaching to children by regularly posting lessons. Lessons are being created by teachers in the form of posts with detailed teachers' explanations and include multiple media formats – text documents, images; audio lectures; weblinks; ; videos from YouTube; recorded video lectures; self-created videos; simulations; worksheets, power-point presentations; and more... In addition teachers will also create and share assessments to be duly filled in by students.

Students will get anytime, anywhere, access to high quality learning resources filtered/created by their OWN teachers through the web application Connected Classrooms. They can view and replay each lesson any number of times for deeper learning.

Individual students' username and password are being provided for each student. The students can login using these credentials and view lessons and assessments created by their own teachers on a regular ongoing basis. These lessons can be viewed by students on most devices, including desktops, laptops, tablets, and mobile phones both android and IOS.
