CLASS II

Dear Parent,

It's summertime when faces light up with a grin
As holidays are about to begin
Time to bond with grandparents too,
Be a helping hand at home, that is what you should do!

Holidays! The word excites and overwhelms us. *Summer Vacation* is the most enviable part of school life! It brings the moments when you once again have your child all to yourself. This is the time when family bonds are strengthened and the most vivid childhood memories are created.

However, it is also time for our children to learn values and skills with lots of activities around. Create an atmosphere of purposeful living and recreation to instil value for time and effort towards even the smallest thing; be it the simple task of caring for a plant, or laying the table for dinner. Adopt an herb, a house plant or a pet, bake a cake, sing-along, paint, draw and compose a song or take up a hobby. Equip your child with the most basic skills such as organising the work area, and wardrobe. Learning to put things in order develops layered and logical thinking in children while inculcating a love for clutter-free and tidy living spaces.

It is time to rejuvenate and revitalize with Summer Holiday Homework comprising of constructive, mindful and reflective activities which will make your child active and observant. These activities are specially designed for the children to help them set goals to stay mentally and physically active throughout the summer break.

What we learn with joy, we never forget!

Happy Holidaying!
