

July 8, 2023

Dear Parent,

Since its establishment in 2018, ATL Lab at BBPS Dwarka has played a pivotal role in infusing spirit of enquiry in pupils. The exemplary tutelage has further enabled them to achieve remarkable success and glory in reputed competitions.

We have been earnestly providing opportunities to students to nurture their scientific temperament. Our pursuits have empowered our students to pursue their dreams.

To further imbue in our students 21st century skills such as logical reasoning, critical thinking and creativity, the school has launched Tinker Club. The school has assigned a highly professional and competent trainer to mentor the students. He will support our students in the ideation, innovation, and creation process. The training modules have been envisaged and designed to guide and train students to emerge triumphant at prestigious competitions like INSPIRE MANAK, IGNITE, CBSE Science exhibition, ATL Marathon etc. Besides mentoring students during school hours, extra classes will be scheduled on weekdays from 2:00 p.m. to 3:00 pm and on all working Saturdays from 8:00 a.m. to 2:00 p.m.

This facility is free of cost for the students. The interested students to give consent to their respective class teachers by July 10, 2023.

We urge all students to seize the valuable opportunity to enhance their technical acumen and march forward with confidence and zeal in the field of science and innovation.

Warm regards

Suruchi Gandhi  
(Principal)
