G20 SUMMIT 2023

"G20 Global Dispatch: Navigating the Insights and Impacts"

FROM THE PRINCIPAL'S DESK

“Education is a social process; education is growth; education is not preparation for life but is life itself.”

— John Dewey

Modern education has transcended the realms of classroom learning with practical knowledge and hands-on experience is gaining a new ground. We endorse the tenets of experiential learning and believe it is essential to bridge the gap between the environment at school which nourishes children at a tender age and the world outside, where our learners contribute to society as responsible citizens, leaders, and policymakers.

The G20 Summit beckoned all future leaders to adopt views and attitudes other than their own and break away from narrow national boundaries to develop international cooperation. The Summit offered an extraordinary opportunity for students to hone their critical thinking and communication skills to collaborate with their peers and widen their horizons. It encouraged children to engage with social and political discourses, formulate a unique perspective and find their individualistic voice to spearhead change.

We hope that the G20 Summit proved to be an intellectually enriching experience for all the delegates, expanding the ambit of their knowledge about international diplomacy and politics & encouraged them to initiate, innovate and inspire.
