## **NEP 2020: PARADIGM SHIFT IN EDUCATION**

Dear Parent,

The National Education Policy (NEP) 2020 has been designed to change the education system in India towards a more well-rounded, multidisciplinary, and creative approach to learning.

Implementing this policy requires the cooperation and participation of all stakeholders as NEP marks a significant paradigm shift in our education system.

The curriculum changes that the school has integrated and adopted are as follows:

1. **Skill Development** as an integral part of the curriculum, focusing on practical skills such as communication, financial literacy, digital literacy, and vocational skills.
2. **Multidisciplinary Approach** to promote critical thinking and problem-solving skills.
3. **Bridge Courses** for classes 3 and 6 to ensure continuity and change across Stages due to new textbooks.
4. **Inclusive Education** by providing support and accommodations for students with disabilities, ensuring their participation and access to quality education.
5. **Assessment Reforms** to move away from rote memorization and encourage competency-based evaluations focusing on skill development and application of knowledge. (Refer to PPT with Class Teacher for detailed design).
6. **Internal Assessment** as an integral part for motivating students to explore beyond textbooks.
7. **Technology Integration** in education, leveraging digital platforms and tools to enhance learning experiences, provide personalized learning, and access relevant resources.

8. **Environmental Education** as a cross-cutting theme to foster environmental awareness, sustainability, and conservation practices among students.
9. **Regular Orientation Sessions for parents (online and offline)** to build relationships with parents and the community.
10. Development of **innovative learning materials** for engaging the students.
11. Introduction of Artificial Intelligence across all classes to upgrade and update our students with the ever-changing technology.
12. **Experiential Learning**: Focus on experiential, inquiry, and discovery-based teaching-learning methods.
13. **Integrated Pedagogy**: Arts, sports, and story-telling and ICT-integrated pedagogy for holistic development of students.
14. **Promotion of peer tutoring**: Promoting peer tutoring as a voluntary and joyful activity under the supervision of teachers.
15. **Bagless Days**: Bagless days have been scheduled in the academic calendar for the development of skills.
16. **No Gadget Zone**: In sync with CBSE policy, smartphones are prohibited in school. Responsible use of gadgets is promoted through various digital wellness activities.

By collaborating and cooperating we can help to improve education outcomes and support student success. This will not only benefit the students but also contribute to the overall development and progress of the country.

Thank you for your continued support as always.

Regards

(Suruchi Gandhi)
