Q1. Read the following passages carefully:

(8)

Norte Dame de Paris means 'Our Lady of Paris' in French. Notre-Dame, a medieval catholic Cathedral, was consecrated to the Virgin Mary, and is considered to be one of the finest examples of French Gothic architecture. Its pioneering use of the rib vault and flying buttress, its enormous and colourful rose windows, as well as the naturalism and abundance of its sculptural decoration set it apart from the earlier Romanesque style. Major components that make Norte Dame stand out include one of the world's largest organs and its immense church bells. The Cathedral's construction began in 1160 under Bishop Maurice de Sully and was largely complete by 1260, though it was modified frequently in the following centuries. In the 1790s, Norte-Dame suffered desecration during the French Revolution; much of its religious imagery was damaged or destroyed. In the 19th century, the Cathedral was the site of the coronation of Napoleon I and the funerals of many Presidents of the French Republic.

Popular interest in the cathedral blossomed soon after the publication, in 1831, of Victor Hugo's novel Notre-Dame de Paris (better known in English as *The Hunchback of Norte-Dame*). This led to a major restoration

project between 1844 and 1864, supervised by Eugene Viollet-le-Duc. The liberation of Paris in 1944 was celebrated within the Notre-Dame. Beginning in 1963, the cathedral's façade was cleaned of centuries of soot and grime. Another cleaning and restoration project was carried out between 1991 and 2000. While undergoing renovation and restoration, the roof of Notre-Dame caught fire on the evening of 15 April 2019. Burning for around 15 hours, the Cathedral sustained serious damage, including the destruction of the fleche (the timber spirelet over the crossing) and most of the lead-covered wooden roof above the stone-valued ceiling.

There was contamination of the site and the nearby environment. Following the fire, many proposals were made for modernizing the cathedral's design. However in 16 July 2019, the French Parliament passed a law requiring that it be rebuilt exactly as it appeared before the fire. Stabilizing the structure against possible collapse continued until the end of 2020, with reconstruction beginning in 2021. The government of France hoped that the reconstruction would be completed by Spring 2024, in time for the opening of the 2024 Summer Olympics in Paris.

Investigators are converging around two theories of what might have caused the devastating fire at Notre-Dame Cathedral: a short -circuit near its spire, possibly caused by electrified bells; or negligence by workers carrying out renovations, a theory fuelled by the discovery of cigarette butts. While visiting the Cathedrale Notre-Dame de Paris tourists can enjoy seeing the Revolutionary Gothic Architecture , Flying Buttresse, The West façade- Kings and Christian Icons, Cathedra Towers, Gargoyles, Stained-Glass Windows, the Serene Sanctuary and the Treasury of Reliquaries.

Q.2. Personal Hygiene (6)

Good personal Hygiene is important for both health and social reasons. It entails keeping your hands, head and body clean so as to stop the spread of germs and illness. Your personal hygiene benefits your own health and impacts the lives of those around you, too. Maintaining personal hygiene is necessary for many reasons; personal, social, health, psychological or simply as a way of life. A good standard of hygiene helps to prevent the development and spread of infections, illness and bad odour.

Poor hygiene can be sign of self-neglect, which is the inability or unwillingness to attend to one's personal needs. Poor hygiene often accompanies certain mental or emotional disorders, including severe depression and psychotic disorders. If you want to minimize your risk of infection and also enhance your overall health, follow these basic personal hygiene habits:

Bath regularly. Wash your body and hair often. Trim your nails. Keeping your finger and toenails trimmed and in good shape will prevent problems such as hang nails and infected nail beds. Feet that are clean and dry are less likely to contract athlete's foot. Brush and floss. Ideally, you should brush your teeth after every meal. At the very least, brush your teeth twice a day and floss daily. Brushing minimizes the accumulation of bacteria in your mouth, which can cause tooth decay and gum disease. Wash your hands. Washing your hands before preparing or eating food, after going to the bathroom, after coughing or sneezing, and after handling garbage goes a long way towards preventing the spread of bacteria and viruses. Keep a hygiene product, like an alcohol-based sanitizing gel, handy for times when soap and water isn't available.

For most people, good hygiene is so much a part of their daily routine that they think little about it. They bathe, they brush their teeth, visit the dentist and doctor for regular checkups, and wash their hands when preparing or eating food and handling unsanitary items. To keep those you care about healthy and safe, help them learn, and be sure that they are practicing, good personal hygiene.

प्रश्न 1 : दिए गए गद्यांश को पढ़कर पूछे गए प्रश्नों के उत्तर दीजिए। (10)

पर्यावरण की समृद्धि और स्वस्थ होने से ही हमारा जीवन भी समृद्ध और सुखी होता है। हमारे पूर्वज प्रकृति की दैवीय शक्ति के रूप में उपासना करते थे, उसे परमेश्वरी भी कहते थे। उन्होंने पर्यावरण का बहुत गहरा चिंतन किया। जो कुछ पर्यावरण के लिए हानिकारक था, उसे आसुरी प्रवृत्ति कहा और जो हितकर था, उसे दैवीय प्रवृत्ति कहा। भारत के पुराने ग्रंथों में वृक्षों और वनों का चित्रण पृथ्वी के रक्षक के रूप में किया गया है। उनको संतान की तरह पाला जाता था और हरे-भरे पेड़ों को अपने किसी स्वार्थ के लिए काटना पाप कहा जाता था। अनावश्यक रूप से पेड़ों को काटने पर दंड का विधान भी था। मनुष्य समझता है कि समस्त प्राकृतिक संपदा पर केवल उसी का आधिपत्य है। हम जैसा चाहें उसका उपयोग करें। इसी भोगवादी प्रवृत्ति के कारण मानव ने उसका इस हद तक शोषण कर लिया है कि अब उसका अस्तित्व ही संकट में पड़ गया है। पर्यावरण प्रदूषण का कारण था प्राकृतिक दोहन। वैज्ञानिक बार-बार चेतावनी दे रहे हैं कि प्रकृति और पर्यावरण की रक्षा करो, अन्यथा मानव जाति नहीं बच पाएगी। इन जीवन-उपयोगी वृक्षों की देवी-देवता की तरह पूजा की जाती है। पर्यावरण की दृष्टि से वृक्ष को परम रक्षक और मित्र बताया गया है। यह हमें अमृत प्रदान करता है, दूषित वायु को स्वयं ग्रहण करके हमें प्राणवायु देता है, मरुस्थल का नियंत्रक होता है, नदियों की बाढ़ को रोकता है और जलवायु को स्वच्छ बनाता है। इसलिए हमें वृक्ष-मित्र होकर जीवन-यापन करना चाहिए।
